

# Accelerating GE Digital's Global Adoption of IoT

## Introduction

GE Digital aimed to train over 6,000 solution developers worldwide on the Predix platform, the OS for the Industrial Internet of Things (IIoT), within just 13 months. They saw an opportunity in Fast Lane to achieve 2,000 certifications in this short timeframe. Fast Lane's rapid ramp-up of SMEs and hands-on lab environments led to exceptional training outcomes, surpassing expectations and accelerating GE Digital's adoption of Predix-based IIoT solutions.

## GE Digital

GE Digital is a leading provider of industrial software solutions, focusing on the Industrial Internet of Things (IIoT). GE delivers software that accelerates electrification and decarbonization across the energy ecosystem - from how power is created, to how it is orchestrated, to how it is consumed. Using data, they transform how our customers solve their toughest challenges. With a mission to drive digital transformation across industries, GE Digital has achieved significant milestones, including the development of the Predix platform.

GE Digital

## Fast Lane's Optimal Training Solution

Fast Lane's solution involved rapidly ramping up 17 SMEs globally within two months. They established and deployed hands-on lab environments to support worldwide deliveries, running multiple parallel classes week after week. Additionally, Fast Lane helped GE to launch a comprehensive global program management service.

## The Challenge of Rapid Global Training Deployment

GE Digital faced the challenge of training over 6,000 solution developers, both partners and internal staff, on the Predix platform within a tight 13-month window. The urgency of this initiative was driven by the need to achieve 2,000 certifications quickly, ensuring widespread adoption and proficiency in IIoT solutions.

## Why Fast Lane? Expertise & Customization

GE Digital chose Fast Lane for their expertise in delivering customized training solutions. After evaluating several options, GE Digital found Fast Lane's tailored approach and proven track record in rapid training deployment to be the ideal fit. Fast Lane's ability to ramp up 17 SMEs globally within two months and establish hands-on lab environments was crucial in meeting GE Digital's ambitious goals.

## Impact and Long-Term Benefits

The results of Fast Lane's solution surpassed expectations, consistently outperforming GE Digital instructors in Metrics that Matter (ROI) reports. This initiative accelerated GE Digital's adoption of Predix-based IIoT solutions with major global and regional systems integrators like Accenture, Tech Mahindra, and Cap Gemini.
